**Purpose:** To demonstrate an understanding of families and their arrangement on the Periodic Table of Elements.

### **Requirements:**

- 1. Create a periodic table out of everyday objects. You may use pictures from magazines, catalogs, clipart, photographs, or actual small objects (**No real candy or food**). You may use pictures of candy or food.
- 2. Glue the pictures or objects to one-half of a poster board (14" x 22")
- 3. The table must a minimum of 5 periods (rows) and 8 families (columns).
- 4. Include a title on the top of your poster, your name, date, and period.

### The Groups or Families:

- Must be names ( you can use the name or characteristic of the actual items)
- Must have a common property
- Must change from top to bottom in a logical way

#### The Periods:

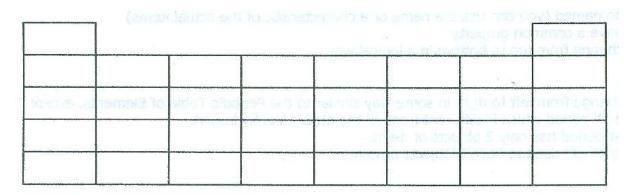

- Must change from left to right similar to the Period Table, except for the 1<sup>st</sup> period which is different all the others (ex. Hydrogen)
- Period 1 has only 2 objects.
- Period 2-5 need to have 8 objects.
- Elements on the periods have little in common, so your objective is on the families and the periods will fall into order.

## Key:

• Make a key/legend to explain how your table is arranged which includes the names of each family.

## **Format for the Periodic Table:**

# **Grading Rubric**

	5	3	1
Periodic Table arranged by Families	*Families all related  *Each Family member is different  *Periodicity in families Hydrogen is different from the first family	*Families all related, but family members the same OR  *Families not related, but family members each different	*Attempt at 8 different families
Key	*Key with clear description of each family	*Key designating family name but no description	
Creativity	*Pictures, drawings, designs by student *Effort is evident	*No pictures, just descriptive words  *Neatly done, effort	*Poorly done with little effort put forth  *Makes no sense or
	*Periodic Table makes sense	*Periodic table makes sense	little sense

/15 points possible
